

METODOLOGÍA - METHODOLOGY

Daily flow: from the classroom to public documentation.

Aules platform

We plan the module in *Aules* (the official GVA Learning Management System, built on Moodle).

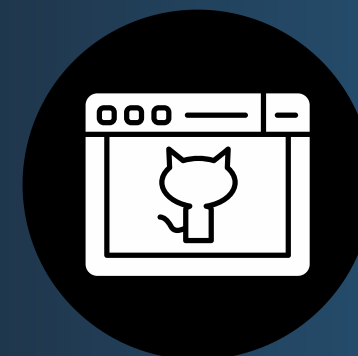

Lessons and tasks

They are linked to my official notes, and written using Markdown, a plain text format.

Github

My notes live on GitHub as Markdown files in a version-controlled repository.

Github Pages

They are published as a website with *GitHub Pages + MkDocs Material*

Students get living, technical, professional documentation.

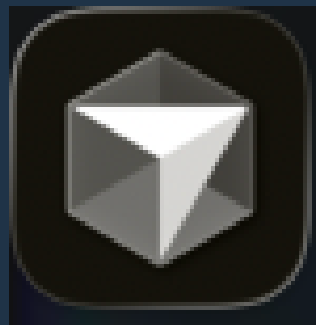

METODOLOGÍA - METHODOLOGY

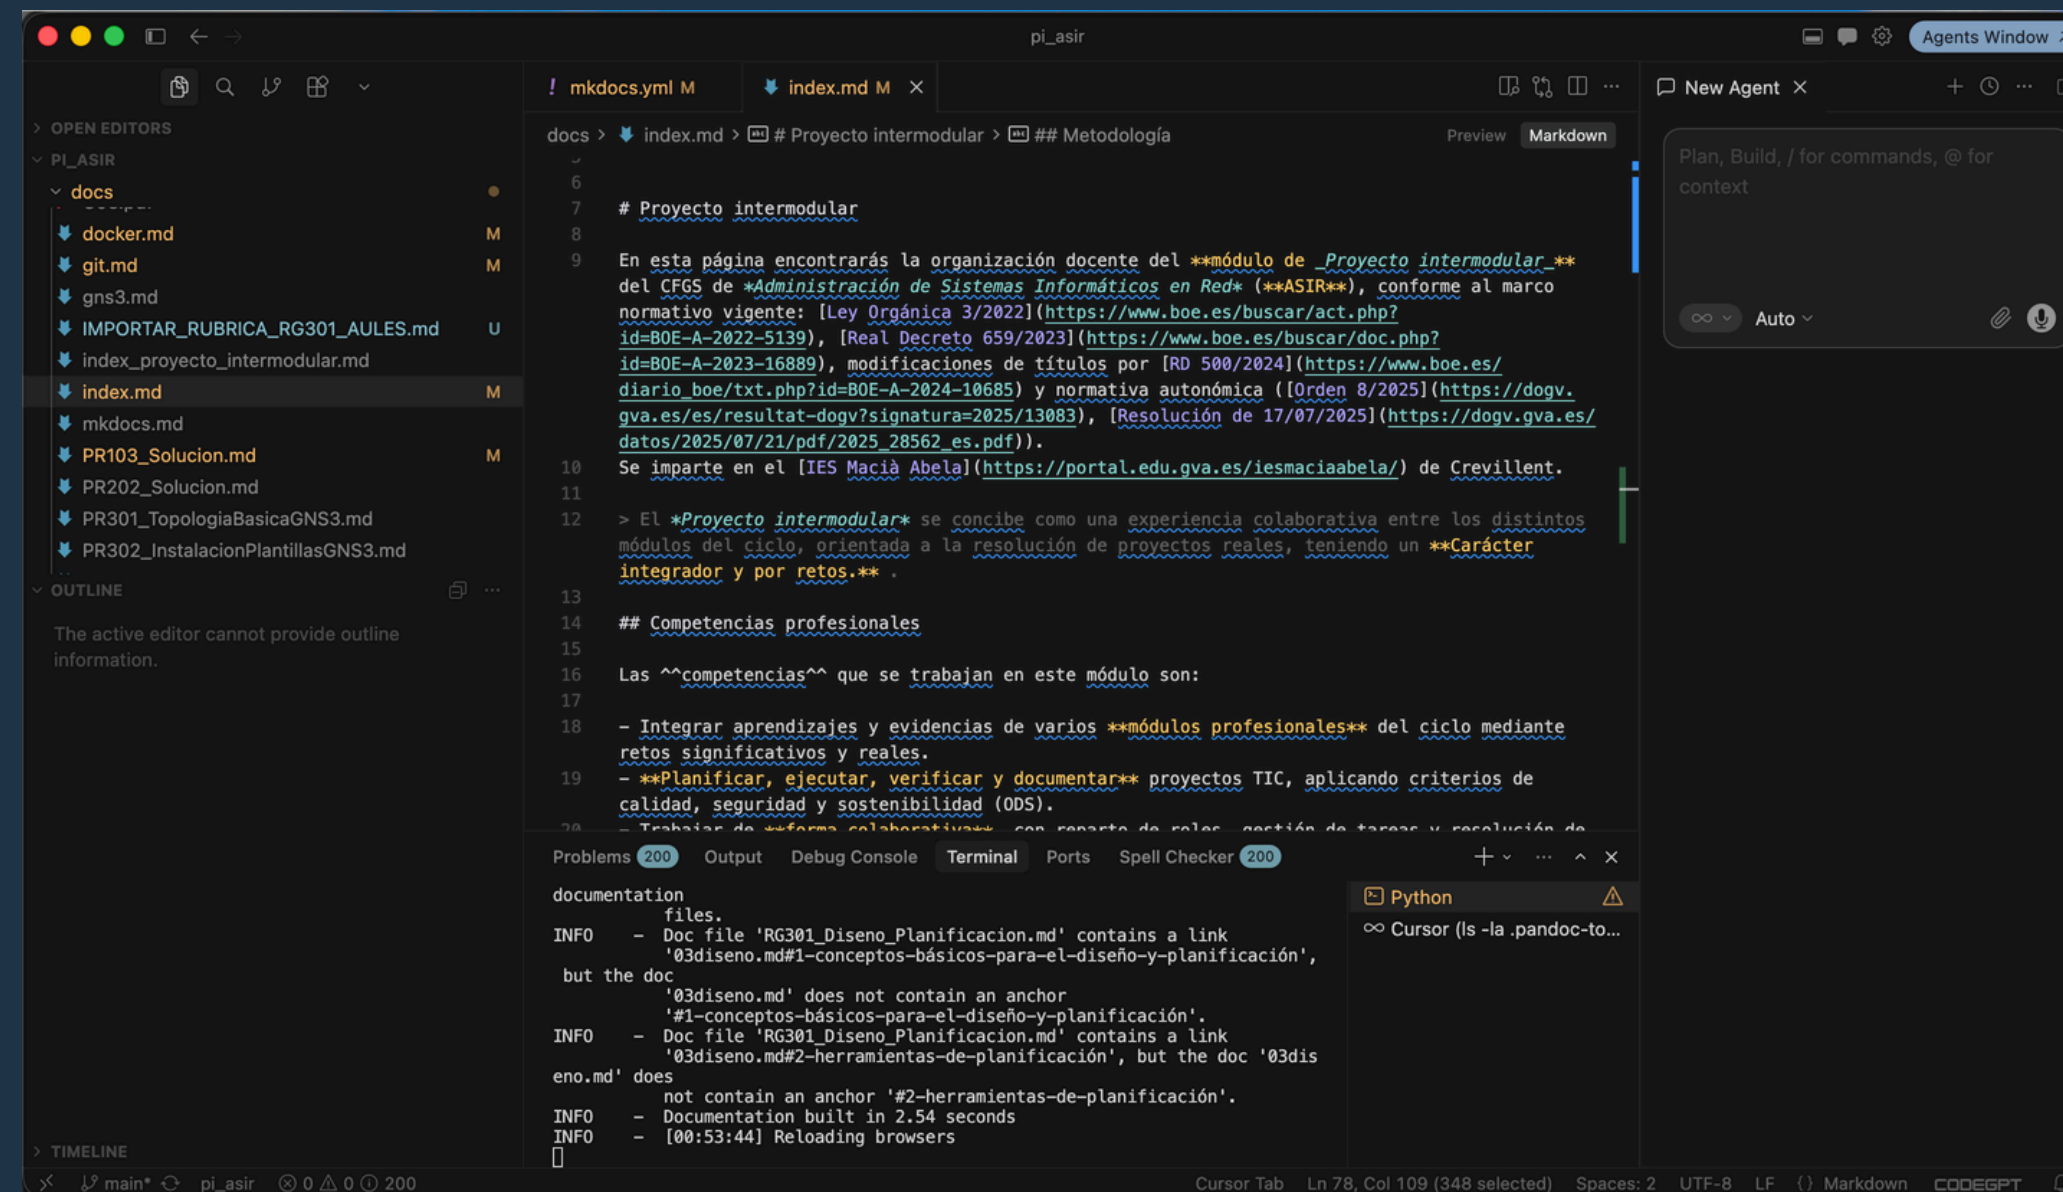

Aules is the official LMS of the Valencian education system, providing virtual learning environments. Lessons and tasks are linked from Aules to my official notes.

The screenshot displays the Aules LMS interface. At the top, the header includes the 'GENERALITAT VALENCIANA' logo, the 'Aules' logo, and a search bar. Below the header, a navigation bar shows 'FP' and 'La meua pàgina inicial'. The main content area is titled 'Proyecto intermodular 2 ASIR' and features a sidebar with a list of courses (Anuncios y Novedades, UT1. Herramientas, PR101, PR102, AC201, PR202, PR203, PR301, PR302, PR303, Gameday AWS 2025, Defensa PI 1ª Evaluación). The main content area shows a 'General' section with a 'Reduïx-ho tot' button and a 'Herramientas' section with a list of tasks (PR101, PR102, AC201) and their deadlines. The right sidebar contains an 'Administració' section with various management options like 'Paràmetres', 'Compleció del curs', 'Usuaris', 'Filtres', 'Informes', 'Configuració del butlletí d'avaluació', 'Resultats', 'Insígnies', 'Banc de preguntes', 'Eines externes LTI', 'Certificats', 'Paperera de reciclatge', 'GVA Aules - Administrar usuaris', 'GVA Aules - Canviar contrasenyes', and 'GVA Aules - Registres del curs'.

METODOLOGÍA - METHODOLOGY

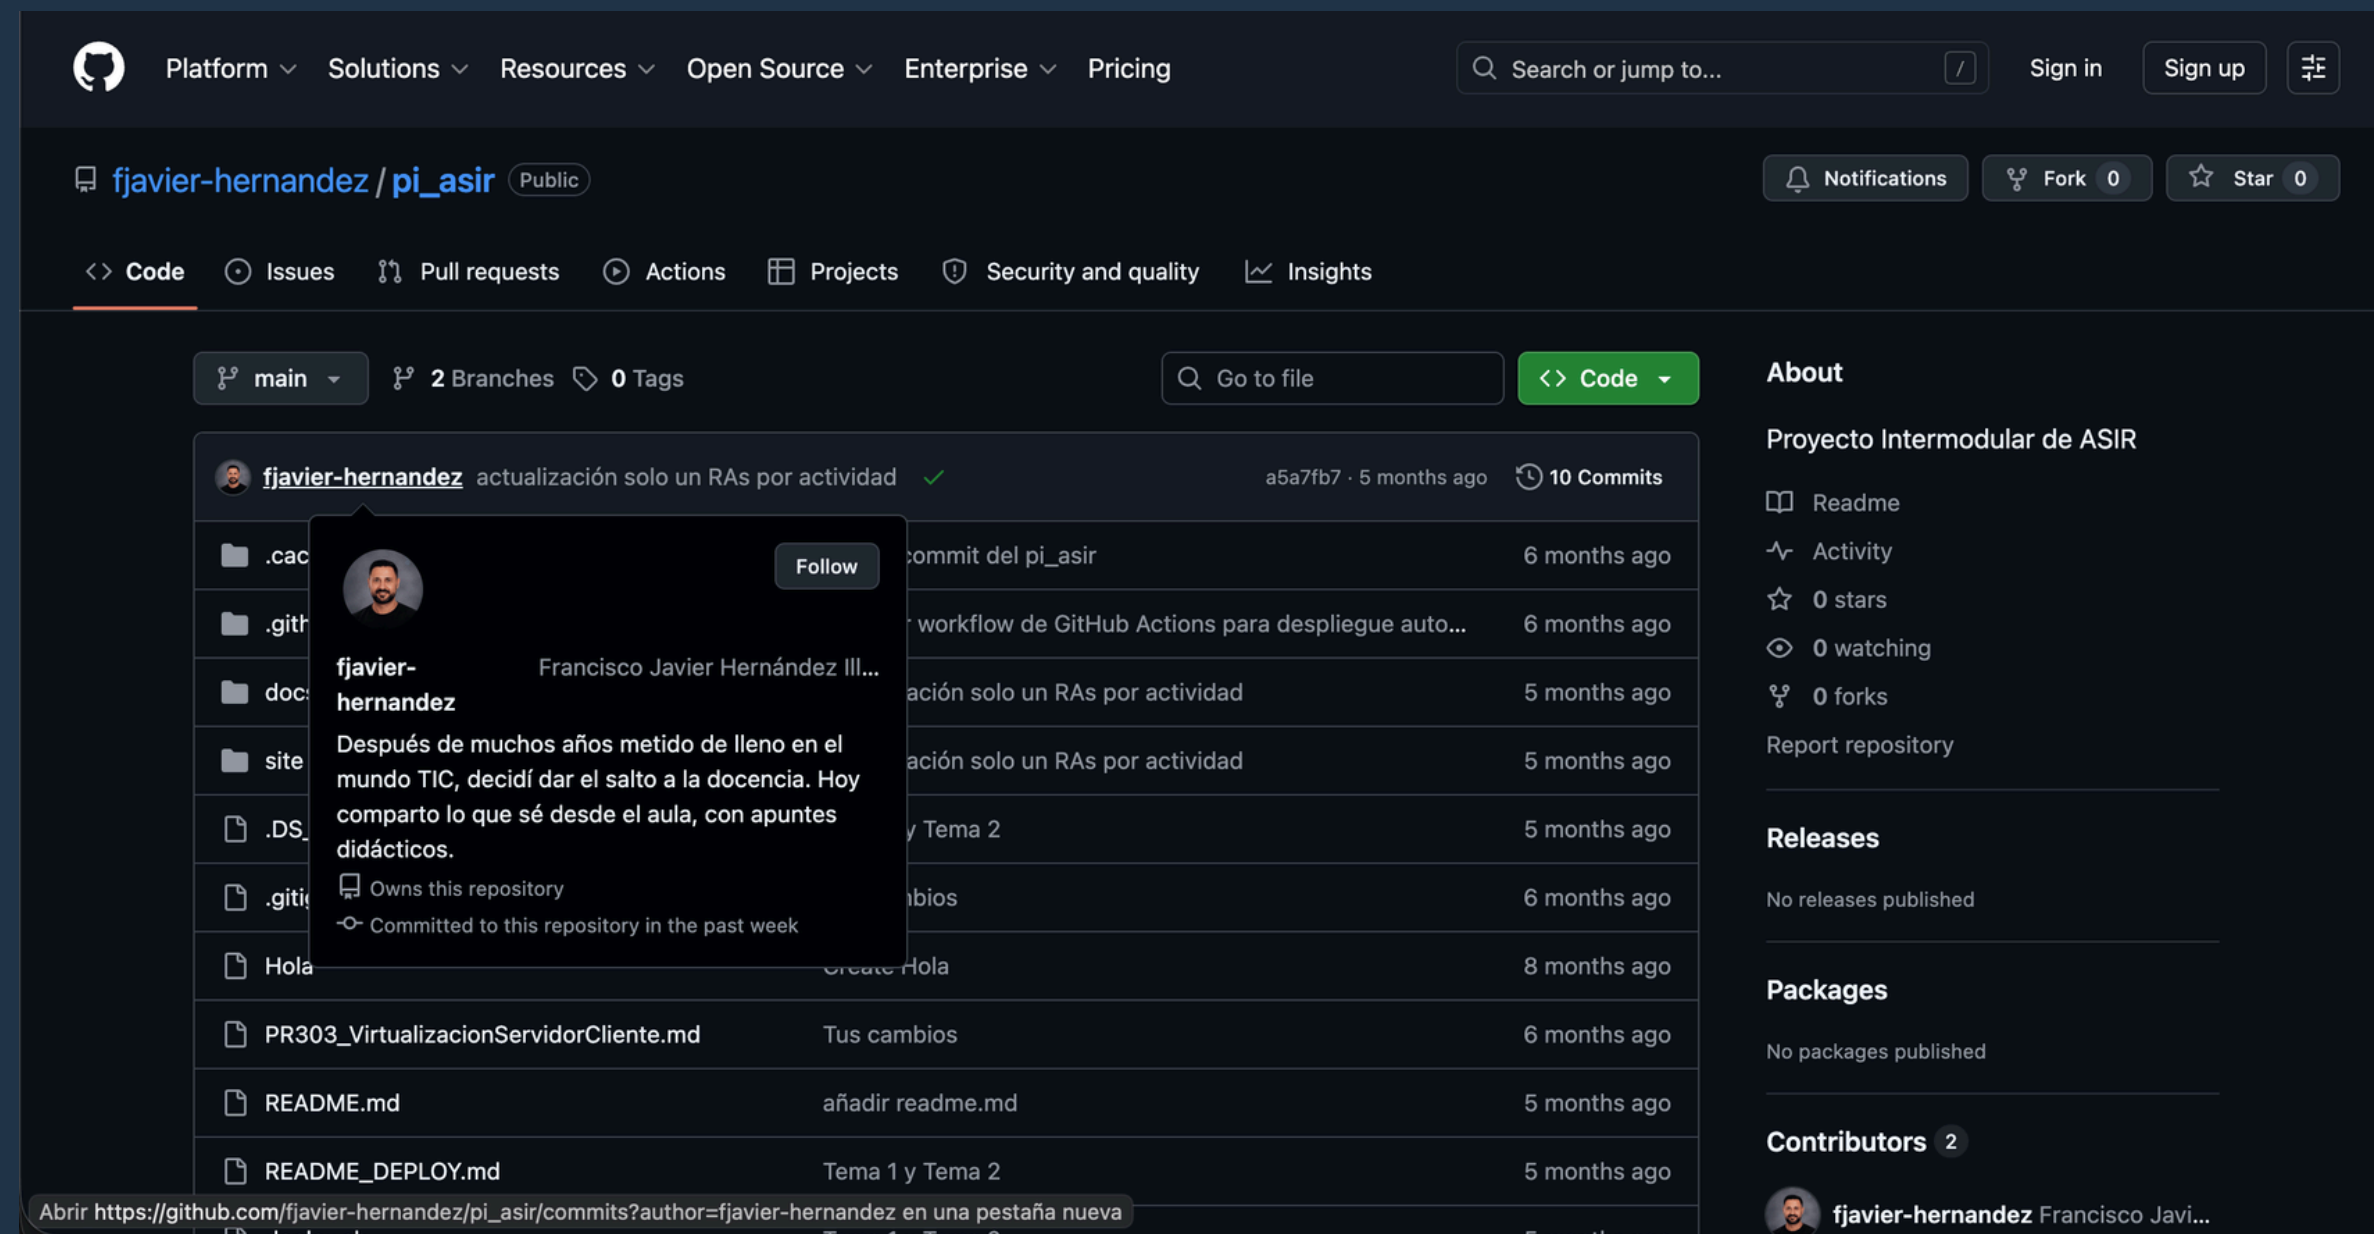

Lessons and tasks are written in Markdown, and managed through a custom notes repository, which I refine using Cursor to improve structure, clarity, and code quality. Cursor is an AI-powered code editor that helps write, refactor, and improve text and code efficiently.

METODOLOGÍA - METHODOLOGY

My notes are hosted on GitHub and organized as Markdown documents within a version-controlled repository. This setup allows me to maintain a structured knowledge base, track all changes over time, and ensure consistency across updates.

A screenshot of a GitHub repository page for 'fjavier-hernandez/pi_asir'. The page shows the repository's main branch 'main' with 2 branches and 0 tags. A commit history table is visible, listing recent commits by 'fjavier-hernandez'. A user profile card for 'fjavier-hernandez' (Francisco Javier Hernández III...) is overlaid on the commit list. The right sidebar contains repository metadata: 'Proyecto Intermodular de ASIR', 0 stars, 0 forks, and a list of files including README.md and README_DEPLOY.md. The bottom of the page shows a URL to view the commit history for the author.

METODOLOGÍA - METHODOLOGY

My notes are published as a static documentation website using GitHub Pages for hosting directly from a repository, and MkDocs Material as a modern framework that provides a clean, structured, and searchable documentation interface.
